

Project Profile

Rural Sewage Treatment System

Location:

United States, Rockfield, Indiana

Precaster:

Wieser Concrete Products

The Situation:

As a small town, Rockfield needed a central sewage system for their city. As a rural town, having a population of 400 plus for the entire county in which Rockfield is located, this system was the most economic and best choice for them to provide their citizens. Having a watertight system would provide them with an environmentally friendly and efficient central sewage system.

The Solution:

Septic Tanks from Wieser Concrete and sealants from Concrete Sealants Inc. came together to create a central sewage treatment system. CS-102 provided watertight seals for the septic joints. Together, the septic tanks and sealants provided Rockfield with an efficient sewage treatment system for their rural community.

Sealant Application

Sewage Treatment System

Applicable Industry Standards:

ASTM C-990

Products Used:

ConSealTM
CS-102
Butyl Rubber Sealant

Don't Just Seal It, ConSeal It!
