

Project Profile

Steam Tunnel Installation

Location:

United States, New York

The Situation:

Construction of a trench that would serve as a utility run for plumbing and steam lines required the installation of a three-sided concrete structure with precast cap.

The Solution:

With temperatures in the trench projected to reach in excess of 130°F, ConSeal's durable CS-102 Butyl Rubber Sealant was chosen to effectively seal the joining precast concrete trench sections.

Sealant Application

Three-Sided Precast Concrete Trench

Applicable Industry Standards:

ASTM C-990

Products Used:

ConSealTM
CS-102
Butyl Rubber Sealant

Don't Just Seal It, ConSeal It!
