

# PROJECT PROFILE

**ANY SIZE.  
ANY SHAPE.  
ANY HEIGHT OR DEPTH.**

**LOCATION: TOLEDO, OHIO | USA**

**SITUATION: BELOW FREEZING TEMP.**

## COLD WEATHER INSTALLATION

### THE SITUATION:

The sealing of precast concrete in northern states is made tricky during the winter due to cold temperatures. A watertight joint is still required for installation, but providing that quality becomes more difficult; therefore, in this installation of precast concrete elliptical pipe it required a sealant that can provide the watertight quality during cold installation.

### THE SOLUTION:

CS-202 was used because it compresses more than other sealants in cold weather installations and provides the same watertight qualities as other ConSeal products meeting the ASTM C-990 Standard - a simple solution with a quality product.

### SEALANT APPLICATION:

**SEWAGE SEPTIC SYSTEM  
ELLIPTICAL CONCRETE PIPE**

### APPLICABLE INDUSTRY STANDARDS:

**ASTM C-990**

### PRODUCTS USED:

#### **CS-202**

**ALL WEATHER,  
BUTYL RUBBER SEALANT**
