

PROJECT PROFILE

**ANY SIZE.
ANY SHAPE.
ANY HEIGHT OR DEPTH.**

LOCATION: ROCKFIELD, IN | USA

PRECASTER: WIESER CONCRETE PRODUCTS

RURAL SEWAGE TREATMENT SYSTEM

THE SITUATION:

As a small town, Rockfield needed a central sewage system for their city. As a rural town, having a population of 400 plus for the entire county in which Rockfield is located, this system was the most economic and best choice for them to provide their citizens. Having a watertight system would provide them with an environmentally friendly and efficient central sewage system.

THE SOLUTION:

Septic Tanks from Wieser Concrete and sealants from Concrete Sealants Inc. came together to create a central sewage treatment system. CS-102 provided watertight seals for the septic joints. Together, the septic tanks and sealants provided Rockfield with an efficient sewage treatment system for their rural community.

SEALANT APPLICATION:

SEWAGE TREATMENT SYSTEM

APPLICABLE INDUSTRY STANDARDS:

ASTM C-990

PRODUCTS USED:

CS-102

BUTYL RUBBER SEALANT
