LOCATION: TIPP CITY, OH | USA

PRECASTER: NORWALK CONCRETE

STORMWATER SEPARATION TANK

THE SITUATION:

A 5,000-gallon stormwater treatment oil/water separator is installed to service Concrete Sealants' new 64,000 square foot facility. For this project a sealant that can provide water tightness with a combination of oil and water is required.

THE SOLUTION:

To provide watertight joints, CS-440 and CS-102 were used in sealing the separation tank. These watertight joints allow the system to be effective and keep oil from being deposited into the environment.
