

SEAL OF SECURITY, BOND OF TRUST.

ConWrap[™] MPS

MULTIPURPOSE PROTECTIVE WRAP

Paintable, Fabric-Backed, Versatile, Exterior Wrap System

DESCRIPTION

ConWrap MPS is a paintable, fabric-backed, cold applied, exterior wrap system used to prevent corrosion of metal and concrete. The high-tack adhesive, peel and stick, self-healing, viscoelastic compound completely encapsulates structures, such as pipelines and tank chimes. Fabric backing allows for a wide range of coating applications, including; CS-95 Ultra-Performance Epoxy, CS-1200 Waterborne Waterproof Coating, and CS-1800 Solvent-Free Waterproofing Membrane.

SEALING PROPERTIES

- Viscoelastic modulus flows into pores and surface anomalies.
- Bonds to metal, concrete, glass, plastics, PVC, vinyl, wood & more.
- Resistant to cathodic disbondment.
- Easy to apply, instant adhesion to substrate.
- Conforms to irregular surfaces.
- Provides a permanent, flexible water and silt barrier.
- Will not shrink, harden or oxidize upon aging.
- High temperature grade option available ConWrap MPS100.
- No cure time, ready for immediate top coat.
- Available in several standard sizes:
 - Standard thickness: 80 mils ± 8 mils (2mm ± 0.2mm)
 - Standard widths: 4" (10cm) x 24' (7.3M) 8 rolls/ctn

6" (15cm) x 24' (7.3M) - 4 rolls/ctn

Custom widths and lengths available upon request.

Spec	ConWrap MPS
	Gray Compund
	Paintable Fabric
ISO 493:1993E	80 mils ± 8 mil
	(2mm ± 0.2mm)
ASTM D71	1.25-1.40
	-45°F to 158°F
	(-43°C to 70°C)
ASTM E1356	-63.3°C
ASTM E96/ISO 21809	0 (ng/m*s*Pa)
ASTM G8/ISO 21809	Pass (0.0 disbondment)
ASTM D257	3.80E+08
ASTM D257	2.70E+13
ASTM D149	9kv/mm
ISO 21809	Pass; no holidays
ISO 21809 Annex D	23°C Pass (>0.6mm)
	70°C Pass (>0.6mm)
ASTM D4587, 1000 hours	Slight discoloration, good
	adhesion to steel
CSA Z245-20-06 Section 12.14	Coating cannot be removed
	cleanly from steel
Tested in 30% sulfuric acid,	Excellent; no deterioration
20% phosphoric acid,	or corrosion after 3 days
	ISO 493:1993E ASTM D71 ASTM E1356 ASTM E96/ISO 21809 ASTM G8/ISO 21809 ASTM D257 ASTM D257 ASTM D149 ISO 21809 ISO 21809 Annex D ASTM D4587, 1000 hours CSA Z245-20-06 Section 12.14 Tested in 30% sulfuric acid,

10% nitric acid, and

10% hydrochloric acid

SURFACE PREPARATION

For Metal: Clean the surface with a brush and remove any dirt or debris, which could keep ConWrap MPS from adhering to the metal. Once all debris has been removed, all dust and grease like substances should be removed with denatured alcohol or similar cleaner. Dry surface required before application. For Concrete: Clean the surface with a brush and remove any dirt or debris. Once all debris has been removed, all dust and grease like substances should be removed with denatured alcohol or similar cleaner. Dry surface required before application. Consult Concrete Sealants with questions about your exact application.

INSTALLATION GUIDELINES

The following procedures should be followed for optimum sealant performance.

- Remove release liner and press adhesive side onto structure.
- Pipe Installation: ConWrap MPS should be applied in a straight circumferential wrap at termination points before continuing in an angled circumferential wrapping method around the length of the pipe using a 1/2" to 1" (13mm - 25mm) overlap. When installation is complete, ConWrap MPS is ready for a wide range of coating applications.
- Tank Chime Installation: Fill gap between tank chime and tank foundation with ConSeal AMS Paste. Apply ConWrap MPS at least 2" (5 cm) on tank chime and 2" (5 cm) on the tank foundation. Overlap ends a minimum of 2" (5 cm). When installation is complete, ConWrap MPS is ready for a wide range of coating applications.
